SUMMARY

I'm a university student majoring in Physics who is interested and has a big passion for software development, especially web and mobile development which is my current focus. Over the past year, I've built some websites using the MERN stack technology. But right now, I'm more focused work on the front-end side using either React JS or Next JS to create beautiful interfaces with various UI animations.

EXPERIENCES

HIFI FMIPA Unpad   (February 2022 - Present)

Staff of Dept. Media and Information (as Web Developer)

I made a database website for the organization using the Express JS framework and developed the organization's company profile website using WordPress.

EDUCATION

SMAN 25 Bandung   (July 2017 - June 2020)

High School Natural Science

Universitas Padjadjaran   (August 2020 - Present)

Bachelor Physics   3,60

LATEST PROJECTS

STOREGG   (January 2022 - February 2022)

https://storegg-lac.vercel.app/

STOREGG is a platform that provides digital content specifically to meet the needs of gamers. On this platform, gamers around the world can top up or buy game credits/ diamonds/game vouchers, fast and cheap.

Datahifi   (March 2022 - May 2022)

https://datahifi.herokuapp.com/

This website was created to fulfill the needs of HIFI FMIPA Unpad in storing the personal data of their members.
